

Frick PAC Chillers are complete, self-contained refrigeration systems that provide efficient solutions for industrial cooling applications

Quality Components

Frick PAC Chillers feature the highest quality components available in the industrial refrigeration industry, including Frick Rotary screw Compressors with variable speed drive technology and Frick LaZerWeld Plate Heat Exchangers.

Low Refrigerant Charge

Frick PAC Chillers can reduce refrigerant charges up to 75%. Lower refrigerant charges reduce safety management requirements resulting in lower cost of ownership .

Compact Footprint

Frick PAC Chillers require up to 50% less space to install than traditional refrigeration systems. A smaller footprint reduces installation costs and preserves valuable square footage.

Reduced Liability

Frick PAC Chillers contain the system refrigerant in a secure location away from people and products.

Lowering your liability can reduce insurance costs and provide peace of mind for your employees and your customers.

Easy Portability

Frick PAC Chillers are built on a single, common base and can be easily transported from one location to another.

A refrigeration plant that can move with your business saves both time and money.

Full Product Line

Frick PAC Chillers are available in a wide range of sizes to meet your refrigeration application needs.
