

TM FILTERS
MEMBER OF HWI GROUP

WE PROTECT YOUR TURBOMACHINERY EQUIPMENT

Seal Gas Filters | Lube Oil Filters | Knock Out Filters | Fuel Gas Filters |
Chemical Injection | Hydraulic Filters | Water Injection Filters | Liquid Fuel Filters |
Upgrade / Retrofit Filters | NON Welded | Custom Made Filter Solutions

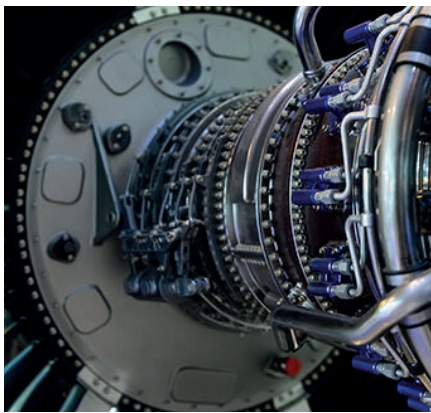

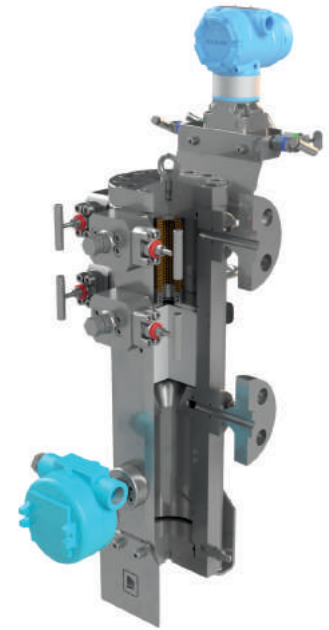

TM FILTERS
MEMBER OF HWI GROUP

TM FILTERS IS YOUR PARTNER IN PROTECTING IMPORTANT TURBOMACHINERY EQUIPMENT SUCH AS TURBINES, COMPRESSORS AND PUMPS. OUR EXCELLENT KNOW HOW AND EXPERIENCE IN DEALING WITH COMPLEX PROJECTS, ENSURES RELIABLE PARTNERSHIP, ON TIME DELIVERY AND OPTIMAL PERFORMANCE ON ALL YOUR ENQUIRIES AND ORDERS.

TM Filters are delivered according to API standards and are designed to the most strict international codes such as ASME, PED, Norsok, DNV Off-shore etc. We comply with End-user specifications such as defined by Saudi Aramco, PDO, Shell, BP, Total, Statoil and many others. We have over thirty years of experience in designing and manufacturing High End Filter Solutions.

TURBINE

Filtration is highly essential for turbine engines. If (sub) micron particles and liquids are not captured by filters, they can cause compressor fouling, blocked nozzles, blade erosion and other unwanted problems.

COMPRESSOR

Compressor endurance are highly depending on quality filtration. Unwanted Particles and liquids can cause premature seal failure, excessive bearing wear, poor oil system performance and other unwanted problems.

PUMP

Filtration is imperative for Pumps. Excessive wear, premature seal failure and other unwanted problems can be prevented by installing a good filtration system.
